2016-Today.

## **Grid Exponential**

Founder of Grid Exponential. GRIDX is the leading VC initiative for early stage investments for biotech startups in LATAM. GRIDX today manages two funds with a total of \$41 MM of AUM. With this fund already invested in more than 90 new companies from Argentina, Brazil, Mexico, Chile, Colombia, Paraguay, Costa Rica and Uruguay. GRIDX also created a bridge from LATAM to worldwide investors for their portfolio companies.

GRIDX's vision is to lead the creation of the region's science-based startup ecosystem. For this, it plans to create and invest in more than 150 new biotechnology companies in the region, solving problems in Ag&Food, Health, Industry and Deep bio sectors. [www.gridexponential.com](http://www.gridexponential.com)

2013-2016

For three years I have dedicated myself exclusively to researching the investment market for science-based projects. For this, I conducted more than 500 interviews with references from the scientific, entrepreneurial, venture capital, businessmen, technology transfer, public policies in entrepreneurship and technology transfer world. I also made trips around the region and the world to learn about experiences. From this process emerged the Company Builder model that GRIDX is developing today.

2013-2014

## **Viditec S.A. (SONY exclusive representative in Argentina for broadcast products)**

After selling my shareholding in 3Way Solutions, Viditec (3Way's new partner) hires me to participate in the merger process of both companies and develop a new business plan..

[www.viditec.com](http://www.viditec.com)

2009-2010

## **Tecnólogos S.A.**

### **Founder**

Intelligent virtual advisor of industrial technology. Tecnologus makes it possible to take advantage of the most important knowledge base available in the world, the patents, and through it, through intelligent search algorithms, offer the possibility to companies to innovate, learn about market trends, new technologies, among other applications.
